Cart-Pro Introduces New Spot Remover for Golf Cart Maintenance

Pompano Beach, FL - January 12, 2004. Cart-Pro, a division of E-Z Care® announced a new product called Hard Water Spot & Mineral Deposit Remover exclusively for the golf car cleaning and maintenance professional. In making the announcement, Judy McCarthy, Division Manager said, "This is our first new product for 2004, and is in answer to requests for a strong, dependable spot remover. A common problem with cart surfaces is hard water spots that are often attributed to high calcium levels in the water. This occurs frequently from heavy mineral deposits in well water. And if the water is left on the surface long enough, the deposits can etch the cart's surface. Our new spray spot remover addresses the toughest mineral residue build-up."

Hard Water Spot & Mineral Deposit Remover is a fast and simple solution for the quick removal of heavy mineral residue build-up on cart bodies that ordinary cleaners or harsh dangerous chemicals fail to remove. Hard Water Spot & Mineral Deposit Remover is non-abrasive and features a new technology that chemically embraces and lifts heavy deposits without harming gel coat gloss.

E-Z Care® manufactures and distributes innovative specialty aerosol products to golf car cleaning and maintenance professionals. For more information, please visit www.ezcareproducts.com or contact Cart-Pro at 800-359-1019.

Cart-Pro will exhibit at the NGCOA Show in Tampa, January 12-13, booth 322, the PGA Show in Orlando, January 29-Feb 1, booth 8643, and the GCSAA Show in San Diego, February 12-14, booth 1309.
